This illustration lists all annual salaries for graduates who claimed they were working more than 30 hours per week. Graduates who quoted salaries below \$10,000 and above \$200,000 per year have been excluded from this report. Only active programs are represented in this report.

* Note that NAIT publishes the median salary instead of the average to minimize the potential of outlying salaries distorting the mean. The median is the value that is at the mid-point of a sorted list of observations or, if there is an even number of observations, the average of the middle two values.

The information on this report provides "snapshot" data for a variety of indicators which may be of interest and use to students, faculty, administrators, and others. It is important to note that data presented on this report may differ from other data sources due to differences in definition or differences in timing. If you notice a significant discrepancy, please contact the Office of Institutional Research (www.nait.ca/ir) for clarification or correction. If you require an updated report, please email John Mazur at jmazur@nait.ca or call 780.378.5073. (File: [Graduate Survey Salaries](#))
