

# Alberta Innovation Voucher Pilot Program

Alberta's Action Plan for *Bringing Technology to Market*

**≡ Bringing Technology to Market**

Are you a **technology or knowledge-driven business** developing new products or services for growing markets? Did your business make less than \$5 million last fiscal year? Do you have less than 51 employees?

The Alberta government is helping small businesses that have great ideas for new products or services, but need help bringing them to market. Alberta Innovation Vouchers, worth up to \$10,000 or up to \$50,000, are available to eligible businesses so they can get access to labs, fabrication centres, professional expertise and services.

To learn more about the program or apply for a voucher, visit [www.technology.gov.ab.ca](http://www.technology.gov.ab.ca)

On-line applications are being accepted until February 13, 2009.
