

RefWorks Direct Export Science Direct: College Edition

Conduct a search in Science Direct: College Edition. When you find articles you would like to export to RefWorks, check the box to the left of an article record (1).

To begin exporting, click the **Export Citations** link (2).

The screenshot shows a search results page from Science Direct. At the top, there are filters for 'Full-text available' and 'Abstract only', and a 'Go to page: 1 of 2480' section with a 'Go' button and a 'Next >' link. Below this is a navigation bar with links for 'E-mail articles', 'Export citations', 'Download multiple PDFs', and 'Open all previews'. The 'Export citations' link is highlighted with a red arrow labeled '2.'. Below the navigation bar is a list of search results. The first result is checked with a box, and an arrow labeled '1.' points to this box. The article title is 'Patients' perceptions of their heart attack and recovery: the influence of epidemiological "evidence" and personal experience'. Below the title is the journal information: 'Social Science & Medicine, Volume 46, Issue 11, 1 January 1998, Pages 1477-1486' and the author 'Rose Wiles'. At the bottom of the article record are links for 'Show preview', 'PDF (158 K)', 'Related articles', and 'Related reference work articles'.

Choose the **Citations Only** option and **RefWorks Direct Export** buttons. Click Export.

Export citation

To export the selected citation + link, select your preferred formats and click **Export**.

The screenshot shows a dialog box titled 'Export citation'. It contains two sections: 'Content format' and 'Export format'. In the 'Content format' section, 'Citations Only' is selected with a radio button. In the 'Export format' section, 'RefWorks Direct Export' is selected with a radio button. There is also a link for 'About Refworks'. At the bottom of the dialog box are 'Export' and 'Cancel' buttons. A red arrow points to the 'RefWorks Direct Export' radio button.

You will be prompted to login to RefWorks if you have not already done so. Under the **View** tab in RefWorks, click **View Folder** and then select **last imported** folder to see your citation(s).
